

STOCKHOLM INTERNATIONAL
PEACE RESEARCH INSTITUTE

REGERINGSKANSLIET

Ministry for Foreign Affairs
Sweden

On the occasion of the launch of a new report *Climate-related security risks – towards an integrated approach*, SIPRI in cooperation with the Swedish Ministry for Foreign Affairs is pleased to invite you to a launch event discussion:

Climate change implications for security - what options for policy?

Climate change is widely recognized as one of the major forces shaping the future. It is also an example of how human actions fundamentally affect the basic physical processes of the world with potentially disastrous consequences for human societies.

Given the profound impact of climate change, it is increasingly being viewed as a source of security risks. What are these exactly and what instruments are there for policy to address those risks?

Thursday, 15 December 2016, 15.00–16.30 at
Ministry for Foreign Affairs, Gustaf Adolfs torg 1, Room Sofia Albertina

Programme *Coffee will be served from 14.30*
